

Your complete supplier of CABLE RECYCLING EQUIPMENT

- Complete systems or single machines.
- Design • Manufacturing • Installation.
- Reliable after-sales support.

A story worth being told

ELDAN Recycling has designed, manufactured and installed cable recycling equipment since 1956. What started with cable cutters has expanded into cable strippers, alligator shears, and ACSR shears as well as machines and complete systems for processing of cables. Since copper and aluminum is 100 % recyclable without loss of quality, recycling of cables has always been a popular business.

Many an ELDAN cable recycling system has been up and running for a long time – some of them for more than 25 years. Due to large changes in the global market, today's customers don't have the same requirements as before. Be sure to take advantage of new opportunities arising and do a health check-up on your cable recycling system today!

Complete systems - low to high capacity

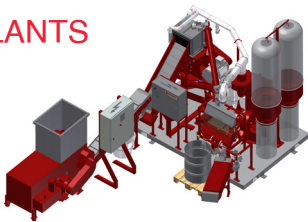

ELDAN Recycling and REDOMA Recycling form ELDAN Group - the leading global supplier of equipment for profitable cable recycling. REDOMA offers small to medium capacity cable recycling plants from 150 kg/h up to 1.300 kg/h while ELDAN focuses on high capacity recycling solutions from 2.000 kg/h up to 10.000 kg/h (for all kind of cable). All lines have a modular design for maximum flexibility and are tailored to suit specific requirements and facilities.

STANDARD PLANTS

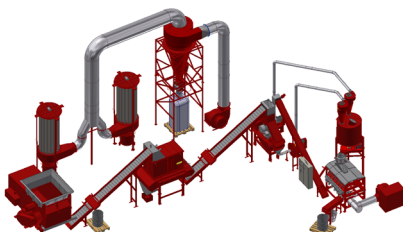

Thunderhawk:
150 - 650 kg/h

Powerkat:
275 - 1 000kg/h

Firefox:
650 - 1 700 kg/h

We are with you all the way!

- Established in 1956.
- Providing complete systems or single machines - from design and manufacturing to installation.
- Developing/expansion of existing systems.
- Modifying/improving existing systems from other suppliers.
- Refurbishing existing systems.
- Reliable after-sales support including original spare and wear part.

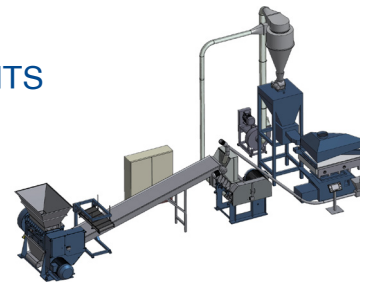

Built for tough working conditions we offer the perfect equipment solutions for every customer.

We have many years of experience in the cable recycling business, and are confident to say that we guarantee both capacity and output fraction quality.

STANDARD PLANTS

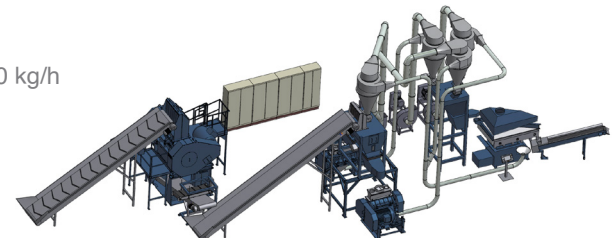

2000C:
900 - 2 000 kg/h

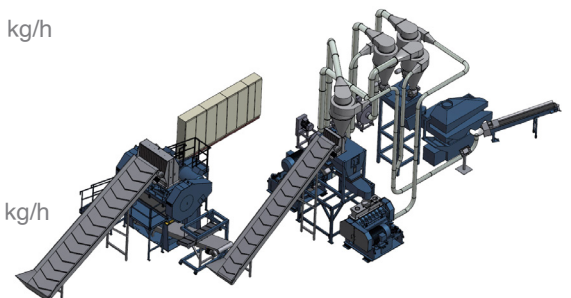

2500C:
1 200 - 2 500 kg/h

3000C:
1 500 - 3000 kg/h

4000C:
1 900 - 4 000 kg/h

5000C:
2 500 - 5 000 kg/h

Take your production to the next level!

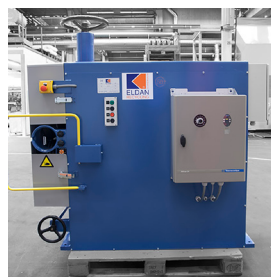

By adding the single or dual shaft pre-chopper **Super Chopper**, the cable recycling plant capacity increases considerably. The frequency drive enables a power saving of up to 50 %.

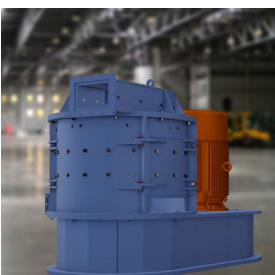

The Classifier is perfect for recovery of metals remaining in the plastic fraction. Reduction of metal losses down to 2,0 %.

The Water Separation Table recovers metals remaining in the plastic fraction. Reduces metal losses down to as little as 0,2 %.

The Cable Strippers peel cables with a diameter from 10-150 mm. Capacity up to 30 meter/minute.

Turbo Mill system
For cleaning of plastic and recovery of metal fines. Offered as a complete system including pneumatic material transport and separation table.

Why choose ELDAN/REDOMA equipment?

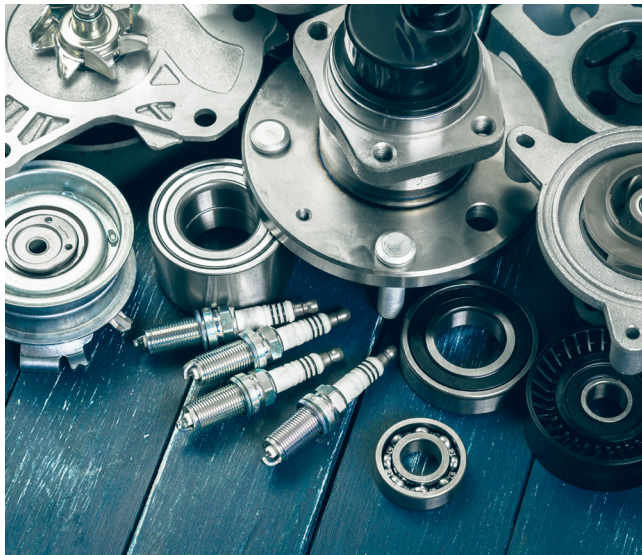

- The world's largest manufacturer of cable recycling equipment.
- Extensive experience since 1956.
- Small, medium, & high capacity.
- Excellent price/performance ratio.
- Low investment costs.
- Overall low cost of ownership.
- High performance.
- Minimum loss of metals.
- Metal purity up to 99,9 %
- Plants/machines are based on ambient mechanical technique for size reduction and separation.
- No melting or chemical treatment is required.
- Plants are tailored to suit your requirements and facilities.

We help you optimize your existing line

With ongoing changes in the global market, cable recyclers should think about upgrading their systems to fit the current business opportunities. At ELDAN we also look at existing systems and pinpoint what can be changed or improved.

A quick & crisp case study

One of our customers located in central USA had ELDAN equipment which had been up and running for more than 10 years. The customer was content with the production, but wanted to see if it was possible to make the recycling facility more efficient. By adding a pre-chopper and making a few other modifications to the system, they increased the capacity from 2.000 pounds up to 10.000 pounds. Working in one shift, the customer will earn back the investment in approximately 1,5 years.

The After Sales Department is there for you!

The After Sales Department is your reliable partner, offering ad hoc and planned service on existing as well as new equipment through our trained and experienced service engineers and supervisors. Our flexible service contracts ensure planned, preventive maintenance of your production line.

We also hold an extensive stock of spare and wear parts for ship-off. In 2023 we sold and delivered 34 200 knives and 1 840 screens to customers in 49 countries. By dealing in these large quantities we can offer you original high-quality spare and wear parts at a highly competitive price - always in stock.
